

Dear Arax,

I would like to share with you the feedback from my employees and my personal opinion about the trainings provided by IAB Centre.

The differences before trainings and after are significant. The level of understanding of English language has been greatly improved. With the trainings we have received from IAB Centre" we have gained not only the practical English but employees have developed their soft skills. We all especially liked very much the Presentation Skills course, which is the one of the first managerial skills needed to grow successful career in the future.

Thank you once more and I will be considering to work with your organization again in the future.

Best Regards,

Sophie Mehrabyan
